The Human Microbiome Company

TEST REPORTED: 02/11/2022

CLINICIAN NAME: CLINICIAN

Lab Director:
Emma Beamish, PhD

TEST RECEIVED: 02/11/2022

PATIENT NAME: FIRST LAST

SAMPLE TYPE: STOOL

PATIENT DOB: 02/11/2022

SEX: FEMALE

Inflammation

RESULTS:

RANGE:

The GI EcologiX™ profile utilises the highly sensitive quantitative PCR (qPCR) TaqMan technology for analysis of the gastrointestinal microbiota. Microbial genes of interest are quantified within a sample and their abundances are normalised to an endogenous and highly conserved gene. The qPCR results are therefore reported as the relative abundance of a microorganism as proportional to the whole microbial community.
